

It is with a heavy heart that I have chosen to leave the Hansell Center and return home to Arizona because of a family-related issue. The Hansell Center remains the most ideal practice for me to work and in no way factored into this decision. In fact, Dr Hansell, her staff, and her patients are amazing and I am extraordinarily sad to have to leave and wish only the best for all.

After January 15, 2024, my patients can either transition to another clinic or you can be put on the clinic's waitlist; however, you will likely not be seen by Dr. Hansell until well into 2025 at the earliest. Why? Because Dr. Hansell provides only the highest level of care and thus can only take on a certain number of patients at any given time. As a result, patient slots only become available as her current patients graduate from needing her care.

I am so sorry about the chaos my personal life has caused and I feel gutted about the situation and wish my personal affairs would have worked out differently. Thank you for giving me the opportunity to care for you.

Sincerely,

Shannon Bybee-Driscoll, MD
